- **Skillbrain**
  Front-End Developer Course
  Completed in 2023

- **State University of Medicine and Pharmacy "Nicolae Testemitanu"**
  Licence in Dentistry
  Completed in 2018

About Me

As a dentist, I transitioned into becoming a front-end developer after discovering a passion for web development as a hobby. I realised that I really enjoy spending time creating websites, implementing new functionality and fixing bugs and errors . This motivated me to make a career change and pursue a new path as a front-end developer. I'm excited to bring my analytical and problem-solving skills from my previous profession into my new role, and I'm looking forward to continuing to learn and grow as a developer on a position where i can apply my skills within a dynamic team environment.

Professional Experience

BinarCode | Front-End Developer Intern
november 2022 – january 2023

Achievements/Tasks:
- Collaborated with a team of developers to develop a Task Manager app using React.js.
- Worked on implementing new features and functionalities, improving the app's performance and user experience, and fixing bugs.
- Contributed to daily stand-up meetings, sprint retrospectives, and code reviews to ensure the successful completion of the project.

Personal Projects

Portfolio Webpage
april 2023 – Present

- Designed and developed a professional and visually appealing portfolio website using HTML, CSS, and JavaScript, showcasing your skills and previous projects.
- Implemented a responsive design that adapts to different screen sizes, ensuring the website is accessible on all devices.
- Used best practices for web development, such as SEO optimization, accessibility, and cross-browser compatibility, to ensure the website is accessible to all users.
- https://zamfir-dev.vercel.app/

Budget Web App
march 2023 - april 2023

- Created a user-friendly Budget app using React.js and React Router, with features such as adding and removing items, sorting and filtering.
- Tested and debugged the app thoroughly, ensuring it was free of errors and met user requirements.

ToDo App
november 2022 – december 2022

- Designed and developed a fully functional Todo app using React.js, with features such as adding, editing, deleting, filtering tasks by status.
- Implemented responsive design and optimized performance for different devices and screen sizes.
